PROFESSIONAL SUMMARY

- Senior Java Developer with over 5 years of experience designing and implementing enterprise-grade, cloud-native applications across E-commerce, healthcare and media domains.
- Built and integrated secure international payment terminals for ECP website using Authorize.net and Stripe, enabling seamless global e-commerce transactions.
- Experienced in applying data structures and algorithms, including sorting, searching, hashing, and index bucketing, to optimize application performance and data processing efficiency.
- Expert in Java 8/11/17, Spring Boot microservices, RESTful and Graph QL APIs, and event-driven architectures using Apache Kafka and RabbitMQ.
- Skilled in cloud platforms including AWS and Azure with hands-on experience in containerization and orchestration using Docker, Kubernetes, and Helm.
- Experienced in building secure and scalable systems leveraging OAuth2, JWT, RBAC, and best practices in API security and microservices authentication.
- Proficient in database development and optimization using Oracle, PostgreSQL, MongoDB, and Redis for high-volume data transactions.
- Adept in CI/CD pipeline automation using Jenkins, GitHub Actions, and Azure DevOps for streamlined builds and continuous deployments.
- Strong understanding of Agile/Scrum methodologies, cloud cost optimization and AI-driven automation to enhance performance and reliability.
- Familiar with modern observability tools such as ELK Stack, Prometheus and Grafana for proactive system monitoring and troubleshooting.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java 8/11/17, Python, TypeScript, Spring Boot, Spring Cloud, Spring MVC, Spring Security, Hibernate, RESTful APIs, Graph QL, Microservices Architecture.
- **Frontend Technologies:** Angular 14+, React.js, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3.
- **Data Structures & Algorithms:** Arrays, Linked Lists, Stacks, Queues, Hashing, Searching & Sorting Algorithms, Index Bucketing.
- **Cloud & DevOps:** AWS EKS, EC2, S3, RDS, Lambda, CloudWatch, Azure App Services, DevOps, Blob Storage, Docker, Kubernetes, Helm, Jenkins, GitHub Actions, Terraform, Ansible, CI/CD Pipelines, Infrastructure as Code(IAC).
- **Databases:** Oracle, PostgreSQL, MySQL, MongoDB, Redis, DynamoDB.
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, Kafka Streams, AWS SNS/SQS.
- **Testing & QA:** JUnit5, TestNG, Mockito, REST Assured, Jest, Test-Driven Development TDD.
- **Monitoring & Logging:** ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Splunk, CloudWatch, Log4j, Application Insights.
- **Version Control & Collaboration:** Git, Bitbucket, GitLab, Jira, Confluence, Maven, Gradle, SonarQube, Agile Project Management.
- **Security & API Management:** OAuth2, JWT, RBAC, SSO, Open API/Swagger, API Gateway, HTTPS/TLS, Security Compliance (HIPAA, SOC2).
- **Methodologies:** Agile/Scrum, SDLC, DevOps, Cloud-Native Development.

PROFESSIONAL EXPERIENCE

Client: Ethics Consulting Partners | SOFTWARE DEVELOPER | Austin, TX **JAN 2024 – PRESENT**

- Built the front-end architecture for **ECP**, a customer-facing **e-commerce** platform combining the Corporate Training site and Promo Store, using **Next.js, TypeScript** and **Tailwind CSS** in VS Code with Git for version control to deliver responsive, high-performance, and accessible user experiences.

- Partnered with **UI/UX** teams to transform **Figma** prototypes into **pixel-perfect**, production-ready interfaces with seamless navigation, intuitive user flows and responsive layouts across all screen sizes.
- • Developed **Spring Boot** backend **APIs** with **Spring Security,** JPA/Hibernate & **PostgreSQL**, managing authentication, course, B2B user & product data with focus on scalability, security & maintainability.
- Integrated and linked Absorb **LMS** via **REST APIs** to synchronize corporate training content, track learner progress, and enable single sign-on (**SSO**) experiences for enterprise clients.
- Developed custom **B2B modules** in both platforms to support organization specific configurations, user management and tailored dashboards, allowing clients to request and manage branded training, promotional assets.
- Currently in the development phase of an AI-powered **chatbot** assistant using **Claude API (Anthropic)** and **Next.js** to enhance user engagement & provide intelligent customer support within the ECP platform.
- Implemented intelligent search, **sorting** and filtering logic in **Next.js** for dynamic courses and product pages, optimizing load performance, caching and data fetching for personalized discovery experiences.
- Integrated secure payment gateways (**Authorize.net** for LMS and **Stripe** for Promo Store) and built a scalable cart & checkout system using **Zustand** for real-time state management, ensuring smooth checkout, cart persistence & accurate subtotal updates.
- Integrated **HashiCorp Vault** with Spring Boot backend services to securely manage and inject **API keys, payment credentials** and database secrets at runtime, eliminating hardcoded secrets and strengthening compliance with **SOC2 and PCI-DSS** security standards.
- Implemented automated testing and **CI/CD** pipelines with **Jest, GitHub Actions** and **Docker**, ensuring continuous integration, regression safety and rapid deployment cycles.
- Deployed the ECP web applications on a **VPS** using **Nginx** as a reverse proxy and load balancer to ensure high availability, secure SSL routing and optimal performance in production

---

COGNIZANT | FULL STACK JAVA DEVELOPER | INDIA **FEB 2022 – JUN 2023**

- Developed **Spring Boot** microservices for EMR systems using JWT-secured **REST** and **Graph QL** APIs to ensure **HIPAA** and FHIR compliance.
- Analyzed patient appointment scheduling workflows and optimized high-volume booking modules by implementing **time slot bucketing** and **hash-based** indexing while improving query time by **40%**.
- Optimized **PostgreSQL** queries using indexed views & efficient data handling & implemented **Redis caching** for frequently accessed patient appointment data, reducing database load & improving API response times by 30%.
- Stored unstructured medical notes and audit logs in **MongoDB**, enabling flexible querying and faster retrieval.
- Automated CI/CD workflows using **Jenkins** and **Docker** to deploy containerized Spring Boot microservices on **AWS EKS**, leveraging **EC2, S3, RDS** and scripting routine system administration tasks in PowerShell to improve deployment efficiency and reliability.
- Automated **AWS infrastructure provisioning** using **Terraform**, creating reusable modules and configuration files for consistent and repeatable environment setups.
- Implemented real-time monitoring with **ELK Stack** and **Splunk** to detect and resolve issues proactively.
- Collaborated in two-week **Agile sprints**, updating tasks in Jira and working closely with QA, UI/UX and product teams to track progress, resolve blockers and ensure timely feature delivery.

ADOBE | ASSOCIATE JAVA DEVELOPER | INDIA **JAN 2020 – FEB 2022**

- Developed modular Java backend services for content management systems, increasing code **reusability** and maintainability.
- Created and optimized **Servlets** and JSP components to improve application load times and performance.
- Applied Test-Driven Development (**TDD**) with **JUnit** & **Mockito** to maintain high test coverage and code quality.
- Provided **L2/L3 ticket support** and resolved **production and ad hoc issues**, improving system stability and reducing resolution time through root cause analysis.
- Automated Linux deployments using **Bash** scripts to minimize downtime during updates.
- Implemented centralized error handling and **logging** for better fault traceability and consistency.

EDUCATION

- Master of Science in Computer and Information Systems **| Saint Louis University, Saint Louis, USA | Dec 2024**

CERTIFICATIONS:

- AWS Certified Developer – Associate **(DVA-C02)**
